Móz Elevators
Interiors and Surfaces

First Impression Is Everything...

Móz Metals create a unique environment for your visitors. Our elevator interiors are pre-fabricated and custom built to meet your specifications. Móz Elevator Interiors are ideal for both new construction and modernization projects. Coordinate your lobby, doors, entrance and elevator interior for a complimentary environment. The benefits of using Móz are:

Móz Metals

Move away from cold stainless steel interiors to the warmth and excitement of Móz Metals. Our unique, almost holographic, metals create an inviting atmosphere.

Aluminum or Stainless

Combining our solid core materials with TuffCoat or DuraFilm finishes create a barrier that is more resilient than stainless steel. Stainless steel provides greater impact strength while aluminum contributes to GREEN requirements.

Our Design Engineering Team

Our expert project managers work with designers, architects and builders to create pre-fabricated designs for ease of installation. We coordinate with other trades throughout all phases of the project.

Durability with TuffCoat and DuraFilm

TuffCoat and DuraFilm

These Special Finishes are added to our solid-core materials to create a barrier for our painted finishes. TuffCoat or DuraFilm is recommended for wainscoting in your elevator interior:

Scratch Resistance

Our architectural products stand up to heavy abuse including key scratches, scuffing, graffiti and other abrasions. They are ideal for high-traffic and public areas.

Easy Maintenance

Móz Metals with TuffCoat and DuraFilm stand up to common cleaning agents including ammonia. Our products are easy to clean and maintain. They allow graffiti to be removed while keeping the protective coating intact.

Product Features

At Móz we have Surfaces, Systems and Solutions for all of your elevator and lobby needs. Our product features include reveals, base plates, custom control panels, door fronts, jambs and interlocking wall panels for easy installation.

Our aluminum and stainless steel materials are available in 16 standard colors and 12 distinctive patterns. Choose from our standard colors and patterns or have us custom-match a signature color for use in your special project. Our architectural products include the following features:

- 1 Unique surfaces 
- 2 Durable finishes 
- 3 Complete packages 
- 4 Custom detailing 
- 5 Pre-fabricated 
- 6 LEED 2.0 MR 

1 Our unique, almost holographic, metals create an inviting atmosphere. The richness and depth of Móz Metals add a dynamic element to your elevator interior.

2 Móz Metals can be specified with Special Finishes providing increased durability, scratch resistance and enhanced appearance to our architectural products.

3 Coordinate your lobby, doors, entrance and elevator interior. Our product line and project managers provide seamless integration.

4 Customized reveals, door fronts, jambs and control panels are just a few details to consider. Please contact us to discuss available custom options.

5 Our pre-fabricated products are easy to install. We work with your team offering support, knowledge and coordination of each phase of the project.

6 Móz aluminum is 80% post-industrial recycled material contributing to LEED 2.0 MR Credit 4 recycled content. Follow the GREEN trends with Móz.
