

Protective Finishes

For Móz Metal sheets

Móz Metals can be manufactured with a variety of protective finish options allowing for a multitude of application choices.

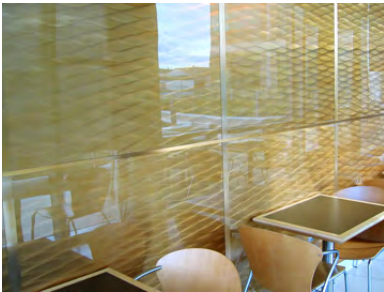

Polycoat - Gloss or Matte

Our standard finish of choice. An automotive-grade topcoat finish able to withstand normal wear and tear.

Recommended for:

Walls, bar fronts, reception desks, and other moderate use areas.

DuraFilm - Gloss or Matte

Protective film topcoat designed for scuffing & graffiti resistance. Best when used with edge treatments to cover corners or seams. Contact us for special instructions on workability.

Recommended for:

High-traffic public areas such as retail and mass transit.

TuffCoat - Textured Matte

Protective film topcoat designed for scratch & graffiti resistance. The textured matte quality may alter the appearance of our colors. Best when used with edge treatments to cover corners or seams. Contact us for special instructions on workability.

Recommended for:

High-traffic public areas such as retail and mass transit. Also suitable for light horizontal use.

Exterior Finish

Specially formulated color pigments and topcoat finish for use with direct exposure to sun and exterior elements. Available for large projects in select colors with some limitations.

Please contact us for pricing and minimum order information. For recommended usage, please submit drawings to show intended application.

Móz Metals are painted metal. It is not recommended to form/curve Móz metals beyond a 2' radius.

All bending/forming, beyond this tolerance, must be done by the factory prior to the application of Móz colors and patterns.
